DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-8, 15, 16, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Wong et al (6,585,555). Regarding claim 1, Wong discloses a ball comprising a core and a cover (col. 2, lines 36-40). The cover includes a thermochromic material that changes according to the temperature (abstract). Regarding claim 2, the thermochromic section is on the surface of the golf ball (abstract). Regarding claim 3, the temperature indication is visible (col. 2, lines 57-63). Regarding claim 4, the visible indication is in at least two parts, several colors are permanently displayed while one or more colors change when the temperature changes (col. 2, lines 57-63). Regarding claims 6-8, Wong discloses the thermochromic materials suitable for the invention are found in US 4,028,118, Nakasuji et al which is incorporated into the '555, Wong patent (col. 3, lines 40-45). Nakasuji discloses the thermochromic material may include liquid crystals or leuco dye. Regarding claims 15, 16, and 18, Wong discloses a ball comprising a core and a cover (col. 2, lines 36-40).

Art Unit: 3711

The cover includes a thermochromic material that changes according to the temperature (abstract). Wong discloses the thermochromic materials suitable for the invention are found in US 4,028,118, Nakasuji et al which is incorporated into the '555, Wong patent (col. 3, lines 40-45). Nakasuji discloses the thermochromic material may include cholesteric liquid crystals (col. 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. The additional cover layer is an obvious duplication of the first cover layer. One of ordinary skill in the art would have included a second cover layer to increase the durability of the ball.

Allowable Subject Matter

Claims 5, 17 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-14 are allowed.

Response to Arguments

Applicant's arguments filed 11-11-03 have been fully considered but they are not persuasive. With respect to the 35 USC 102(e) rejection applicant argues the Wong reference discloses a water toy ball and not a golf ball. Applicant further states that since a golf ball is not disclosed in the Wong the claims are not anticipated. The Examiner disagrees. One of ordinary skill in the art would define the term "golf ball" as a round object capable of being used in a game of golf or capable of being struck with a club, i.e., practice ball. The ball disclosed by Wong is definitely capable of being struck with a golf club during practice.

Applicant further argues the additional cover layer is not an obvious duplication in claims 9 and 20. Applicant also states a prima facie case of obviousness has not been established. However, applicant does not provide reasons or comments supporting this position. Therefore the 103 rejection is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
